EXPERIENCE

Lead AI Automation Engineer & Python Developer 01/2023 – Present

Self-Employed / Freelance, incl. Upwork

✈ Addis Ababa, Ethiopia (Remote)

- Direct end-to-end delivery of 5+ production AI automation systems for international clients, independently owning architecture, development, and deployment
- Engineered MediaWire, a full-stack AI press intelligence platform scraping journalist contacts from 4 major outlets (CNBC, WIRED, AP News, CNET), cutting manual PR research time by 90%
- Architected a 5-stage ETL pipeline processing 100,000+ CPA license records with Jaro-Winkler fuzzy deduplication, SHA-256 audit verification, and chunked PostgreSQL import, achieving zero data loss
- Shipped a Media Intelligence Suite of 6 enterprise Tkinter desktop apps, automating a PR research workflow that previously required a full team
- Automated a 24/7 Ethiopian jobs aggregator with Groq AI qualification extraction and Telegram Bot API posting, and integrated Claude API/Groq LLMs across 4+ tools for intelligent scoring and content generation

Lead Full-Stack Developer (Sole Engineer)

01/2024 – 12/2024

ConcreteRent

✈ Remote (Contract) concrete rent.com

- Owned design and delivery of ConcreteRent.com end-to-end across a 12-month solo build, managing every phase from requirements gathering through deployment
- Built the full React frontend, including an equipment catalog, booking flow, and mobile-responsive UI
- Implemented the Python/Flask backend with a REST API, database integration, and complete business logic

PROJECTS

MediaWire — AI Press Intelligence Desk

github.com/JhonsanAyalew/MediaWire-Press-Intelligence-Desk

AI-powered PR platform that scrapes journalist contacts from CNBC, WIRED, AP News, and CNET, scores them with Claude AI, and auto-generates personalized pitch emails via a React dashboard.

Impact: Reduced journalist research time from hours to minutes

Media Intelligence Suite — 6 Enterprise Desktop Tools

github.com/JhonsanAyalew/media-intelligence-suite

Six desktop apps for media monitoring across CNBC, Business Insider, AP News, CNET, The Verge, and WIRED, with Cloudflare email decoding, Google Sheets sync, and deduplication.

Impact: Automated a full PR workflow that normally requires a team

CPA Data Ingestion Pipeline — Enterprise ETL System

github.com/JhonsanAyalew/cpa-data-ingestion-pipeline

5-stage ETL system for NASBA CPA license records, with parsing, normalization, chunked PostgreSQL import, and fuzzy-match deduplication.

Impact: Processed 100,000+ records with zero data loss and full traceability

Ethiopian Jobs Aggregator Bot

github.com/JhonsanAyalew/ethiopian-jobs-bot

Automated bot that pulls listings from Ethiopian job platforms on a schedule, uses Groq AI to extract qualifications, deduplicates listings, and posts curated jobs to a Telegram channel.

Impact: Runs fully autonomously 24/7 with zero manual intervention

SUMMARY

Python Developer and AI Automation Engineer with 2+ years of experience building intelligent automation systems, ETL pipelines, and full-stack web applications. Delivered 5+ production-ready projects integrating large language models (Claude API, Groq) that eliminate hours of manual work. Strong foundation in data engineering, large-scale web scraping, and full-stack development with React and Flask. BSc in Computer Science, Ambo University (CGPA 3.68). Open to full-time, contract, and sponsored positions in Europe or remote.
